As a Management Information Systems student, I have a strong interest in digital transformation, systems analysis and coding. I am highly curious about technology and the philosophy of information systems, possess strong analytical thinking skills, and continuously strive to improve myself by exploring new technologies.

EXPERIENCE

Web Developer Intern, Pavia University

July 2025 - October 2025

I completed an internship in Italy through the Erasmus program. I worked as a Web Developer at the University of Pavia Robotics Lab. My responsibilities included designing UI/UX flows and writing front-end code for websites developed for companies. I used HTML, CSS, JavaScript, and Hugo in these projects.

Data Scientist Intern, Google AI and Technology Academy

January 2025 - August 2025

I was selected as a scholarship recipient of the Google Artificial Intelligence and Technology Academy for the 2025–2026 term. After completing the Data Science with Python course on Coursera, I participated in Ideathon and Hackathon competitions. I successfully completed the program by submitting a final project with my team.

Online Intern, Denizbank

June 2022 - September 2022

Through the Denizasiri Internship Program, I gained insight into banking applications and operations and became familiar with the roles and processes of different departments. By interacting with mentors and employees, I expanded my professional network and completed a comprehensive banking training program.

EDUCATION

Dokuz Eylul University, Izmir - Management Information Systems

September 2023 - Present

I am receiving education through a multidisciplinary curriculum that includes data science, production planning, decision support systems, cloud computing, and artificial intelligence. This curriculum helps me develop both technical and managerial skills.

Marmara University, Istanbul - International Relations

August 2020 - September 2023

PS: Dropout

PROJECTS

Route35 - Decision Support System

December 2025

As part of the Decision Support Systems course, I developed a management dashboard for the city of Izmir using real-world data. The project analyzed passenger movements across metro, tram, and bus lines within urban transportation to support managerial decision-making. I was responsible for the interface design, database architecture, and implementation of the system.

Digital Order Bridge - CRM

November 2025

As part of the Information Systems Analysis and Design course, we developed a CRM system as a team of four. The goal was to digitalize order management between a factory in Istanbul and its distributors. The system also covered processes such as inventory and sales management. I worked as a Backend Developer in the team and designed the system architecture using Node.js.

Historical Digital Twin of Milano**October 2025**

Final project completed during my web developer internship. I created a website by combining my personal experiences in Italy with the technical skills I gained during the internship program. After completing the design process using Figma, I implemented the website using the Hugo framework.

Blue Twin (Hackathon'da 3.'lük Ödülü)**May 2025**

Our team of four won third place in a competition organized by Izmir Municipality. To support efforts against water pollution in Izmir, we developed a website that visualized all water resources across the city. I worked on the project as a Geographic Information Systems (GIS) developer, creating map-based visualizations using live data.

Raspberry Pi - Air Quality System**December 2024**

As part of the Computer Hardware course, I built a hardware system using Raspberry Pi 3. With the sensors I integrated, the system can measure environmental conditions such as air quality, temperature, humidity, and pressure. I used Python to program and control the sensors.

VOLUNTEERING

Rotaract Üyeliği, District 2420- Türkiye**September 2021 - August 2023**

I took an active role in community service projects, charity events, and youth-focused leadership activities within Rotaract.

Welcome Committee Coordination Team - TEDxReset**October 2019 - March 2020**

I supported guest reception and coordination processes at the event venue. I welcomed speakers and participants, provided information about the program, and contributed to the smooth flow of the event.

PERSONAL INFORMATION

I was born and raised in Istanbul and currently live in Izmir for my undergraduate studies. I was born on March 7, 2002. My interests include swimming, visiting ancient cities, solving Sudoku puzzles and watching independent Turkish cinema. I have strong communication skills and am a responsible and adaptable team player. I work well in group projects, quickly adapt to team dynamics, and complete assigned tasks efficiently. I have B2-level proficiency in English and I am currently continuing to learn Italian.
